ABOUT US OUR STRATEGY & MISSION

We Don't Just "Install Software" ...
We Automate Your Business To Achieve Its Goals!

PRACTICALITY - We can't keep training staff to memorize all procedures and required attachments! Let's put these processes in your software to quickly guide staff and grow your service capabilities.

ECONOMY - Don't continue to pay for repetitive work which can be easily automated. The costs of automation are minor compared to the years of paying for manual administration.

DATA INTEGRITY - Inaccurate data and human error are the biggest cause of bad decisions by company owners and management. Don't keep taking this risk!

GROWTH - Even if companies sometimes reach the summit quickly, maintaining it requires solid foundations. Make plans to invest in these foundations to maintain sustained growth and success!

ORGANISATIONAL VISION vs OPERATIONAL VISION

Organizing a company to run properly and efficiently does not happen on its own. Management & Administrative Consultants exist to make this happen.

Just as one plans for Marketing, Sales, Operations, and Finance, one must Organize Business Processes to support the growth of these important departments.

Management should also decide on the Organizational Vision of a company and not only the operational vision before starting to implement software that might not be able to achieve this vision. This is one of the most common mistakes that companies do to solve an immediate problem.

- Some of the important points that should be considered is:
- Will information be exchanged between departments to support team collaboration?
- Will repetitive tasks and data entry be reduced?
- Will there be features that reduce resource wastage and opportunity losses?
- Will it improve decision making with up-to-date reports available anywhere?
- Will the system interconnect between departments in different locations as we grow?

SO WHY CHOOSE US?

We solve your immediate problem and step by step work with you towards implementing a whole ERP system.

We can customize and modify software as per client needs.

Our experience in implementing software into different working environments.

We understand the problems Executives have when running their companies

You can reach us in our office – we are not freelancers that you can't find when things go wrong. Our aftersales service is matched by none.

Point of Sale Systems

**Are you keeping track of your inventory & sales?
Do you know your losses from no stock on good selling items?
Are you able to analyze your sales, costs & profit?**

We can help you with a POS System that can do much more than just place kitchen orders or make simplified tax invoices.

Turn your POS into a real powerhouse that can:

- Keep track of your Purchases
- Keep track of your Recipes
- Notify the team to order ingredients.
- Keep track of your Inventory
- Keep track of your Sales
- Report for Business Analysis & Auditing

B2B Customer Relation Management

Sales Pipelines & Deal Follow-Up

Are you running behind on your goals & targets?
Are you able to forecast what your future Sales will be?
How can you grow the company?

We can help you with Marketing, Customer Relations and/or Sales Software so that you can achieve growth and meet your expectations.

Automate in Arabic or English

Property Rental Management

Do you have many apartments for rent?
Is keeping with their bookings, cleaning,
maintenance and management contracts
becoming a headache?

Let us streamline your processes with a Property
Management Software that incorporates:

- Rental Contracts & Forecasts
- Booking Management
- Rental Income & Other Incomes
- Property & Maintenance Expenses
- Per Location Profit & Loss

Client Administration & Filing Software

Do you have many client files to keep up to date?

Are you constantly having to schedule client meetings and work tasks?

By switching to a computerized system, all your client documents and files will be centrally available no matter where you are.

You will be able to follow-up each clients work tasks, deadlines, meetings etc. from one software.

Software Implementation

Financial Control & Accounting
Is Financial Control important to you?
Do you want operations to be more profitable?
Do you know where money is being wasted?

With the Full Accounting Software, you can control your Purchasing, Inventory and/or Manufacturing costs to achieve greater cost management and profitability.

Inventory Management

**Need a simple way to manage your inventory?
Keep track of Sales and Re-Orders needed?**

Our system will handle all your inventory needs:

- Item Master
- Stock Management
- Sales Management
- Product Management
- User Management System

Software Implementation Human Resources

Do you have many employees?

Is keeping with their schedules, benefits and monthly calculations getting out of hand?

Let us streamline your processes with an employee management software integration or maybe just help by organizing one of the following:

- Recruitment Process
- Vacation Management
- Employee Appraisals
- Vehicle Fleet Management

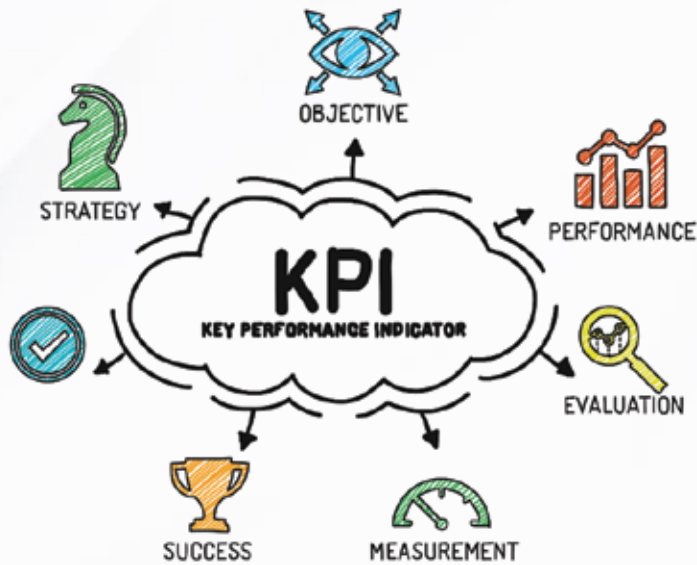

Software - Team & Project Management

Corporate Team & Project Management

Do you have the necessary tools to make sure that the team is operating properly and on schedule?

Is the team under-performing?

Delivery & Task Pipelines keeps Managers aware of what needs attention, while planning and collaboration tools keeps the team prioritized, coordinated, and more efficient.

Executive Dashboards

Do you know what your KPIs are on a daily, weekly or monthly basis?

Do you know if they are on or behind your Targets or compared to last year?

Know which company department are under performing and make sure to correct it before it is too late.

System Integration

With Systems Integration you can connect different software in your company which makes for easier management and manual work!

We will develop the custom program to be a bridge between your two software and remove human error and time wastage when having to constantly do it manually.

Testing and Support for 1 year included.

Software Migrations

Are you tired of not having IT Support for your old software?

We can switch all your data from your old software to new software which can provide you with greater features and peace of mind.

Let us get rid of your problem and give you a solution!

Testing and Support for 1 year included.

Personal CCTV Solutions

Do you want a centralized
CCTV system to watch over
your business?

Do you want a centralized CCTV system
to watch over your business?

We offer cloud solutions for your home or
business so that you may monitor both
via any Wi-Fi network.

- CCTV Solution
- Network and Wi-Fi Solutions
